**Exam : 000-583**

**Title : IBM Content Analytics and  
Search V2.2**

**Version : Demo**

1.What is the minimum number of servers for a distributed configuration?

- A. One server; master server
- B. Two servers; master and crawler servers
- C. Three servers; master, crawler, and search servers
- D. Four servers; master, crawler, document processor, and search servers

**Answer: C**

2.Which is NOT a supported operating system.?

- A. AIX 5.3 (32-bit)
- B. AIX 6.1 (64-bit)
- C. Red Hat Enterprise Linux Advanced Server (32-bit)
- D. Microsoft Windows Server 2003 Enterprise (32-bit)

**Answer: A**

3.When you map the common analysis structure to the index, what are you determining?

- A. which users can invoke the REST API to find documents
- B. which custom annotators will run in the document processing pipeline
- C. the structure of the facet tree that will show up in the text miner application
- D. which analysis results are indexed to enable search and text mining on them

**Answer: D**

4.Which documents from the collection are used to create the clustering proposal?

- A. All of the documents in the index are used.
- B. A random sample of the number that you specify
- C. The first 1000 documents that were added to the index.
- D. A round-robin alphabetically ordered sampling from each different crawler

**Answer: B**

5.How do you find the option to enable the named entity annotations?

- A. Select the 'system' option and then the 'parse' tab in edit mode.
- B. Open the text miner and select the 'named entity' facet then click on the facet tab.
- C. You do not have to enable them, they are always active for text analytics collections.
- D. Edit a collection, select the Parse and Index page, and click Configure document processing pipeline.

**Answer: D**

6.How can you enable duplicate document detection for web content?

- A. Select duplicate detection from the edit of a collection, under the search tab.
- B. Select duplicate detection from the user preference on the search application.
- C. Select duplicate detection from the edit of a collection, under parse and index tab.
- D. Select the link-based ranking model and disable security during collection creation.

**Answer: D**

7.What does the acronym UIMA stand for?

- A. Uniform IBM Marketecture Asset

- B. Unstructured Industry Matrix Alliance
- C. Unified Information Machine Architecture
- D. Unstructured Information Management Architecture

**Answer: D**

8.What must you do after you create a list of synonyms in an XML file?

- A. Convert the XML file to java.jar format.
- B. Import the XML file using the administrative console.
- C. Convert the XML file to a binary synonym dictionary.
- D. Reimport the dictionary.dic file using the administrative console.

**Answer: C**

9.Which statement is NOT true about synonym dictionaries?

- A. Words are specific to a language with the synonym dictionary.
- B. Only one synonym dictionary can be associated to a collection.
- C. Synonym dictionary can be used to improve search of acronyms.
- D. Add a synonym dictionary to the system, then associate it to a collection.

**Answer: A**

10.Which languages listed are supported for text analytics collections?

- A. French, Arabic, Hindi, Malay
- B. German, English, Polish, Greek
- C. Hebrew, Italian, English, Russian
- D. English, Spanish, Arabic, German

**Answer: D**

11.Which cannot be configured in the search server administration?

- A. The ability for users to issue wildcard queries.
- B. The character which is used to indicate a wildcard query.
- C. The ability for users to issue a wildcard query that returns all documents.
- D. The number of potential matches the system will search for a wildcard query.

**Answer: B**

12.Which statement is NOT true?

- A. The 'esadmin' command can stop a crawler.
- B. The 'esadmin' command can start a crawler.
- C. The 'esadmin' command can create a crawler.
- D. The 'esadmin' command can monitor a crawler.

**Answer: C**

13.Which statement is NOT true?

- A. Queries can be federated across multiple search collections.
- B. Queries can be federated across multiple text analytics collections.
- C. Faceted queries cannot be federated across multiple search collections.

D. When queries are federated across collections, the search quality is dependent on the scores that are generated by individual collections.

**Answer: B**

14. Which of the following is NOT a type of facet available in the search application?

- A. flat facet
- B. date range facet
- C. hierarchical facet
- D. auto-normalized facet

**Answer: D**

15. Which statement is true for UNIX platforms?

- A. The 'esbackup.sh' command must be executed with 'root' privileges.
- B. While 'esbackup.sh' command is executing, administrator may continue to use the administrative console.
- C. If 'esbackup.sh' command takes too long to execute, the administrator may Ctrl-C out of it and retry at a later time.
- D. After 'esbackup.sh' command is completed, the backed up files can be used to restore a system with a new installation.

**Answer: D**

16. What is the method used to check the status of indexing on a collection?

- A. Open the text miner and click on the 'dashboard' tab.
- B. Using the administrative console, stop the indexer component and then click on the log tab.
- C. In the administrative console, click on the 'general' tab, on the 'edit' icon and then on 'view collection settings'.
- D. In the administrative console, click on the 'parse and index' tab, on the 'monitor' icon and then click on 'details'.

**Answer: D**

17. Which of the following statements is true?

- A. Only search collections can use hierarchical facets.
- B. Search collections can be configured to export search results to a Cognos report.
- C. Named entity annotators can be enabled in the administrative console for search collections.
- D. Search collections can be configured to use multiple different document dates from the index in the search application.

**Answer: A**

18. How does the IBM Classification Module annotate documents?

- A. with tokens extracted from the documents
- B. with entities identified and extracted from the documents
- C. with relationships identified and extracted from the documents
- D. with one or more known categories derived from the documents

**Answer: D**

19.Which date format will ICA accept as a valid date field for the date facet?

- A. MM/DD/YYYY
- B. MM-DD-YYYY
- C. YYYY-MM-DD
- D. HH-SS-MM-DD-YYYY

**Answer: C**

20.Why would you create a text analytics collection instead of a search collection?

- A. when you want to use a custom annotator
- B. when only search applications are required
- C. when discovery and data mining are required
- D. when searching for documents in more than one collection is required

**Answer: C**
