- D. modifiedTime

**Answer:** B

**Explanation:**

[https://www.ibm.com/support/knowledgecenter/SSSHRK\\_4.2.0/tpdb/reference/tpdb\\_managedstatus.htm](https://www.ibm.com/support/knowledgecenter/SSSHRK_4.2.0/tpdb/reference/tpdb_managedstatus.htm)

3.Which command will verify that Apache Storm has database access?

- A. \$NCHOME/precision/scripts/ncp\_storm\_validate\_dbAccess.sh db
- B. \$NCHOME/precision/scripts/ncp\_storm\_validate.sh db
- C. \$NCHOME/precision/scripts/perl/scripts/ncp\_storm\_validate.p1 db
- D. \$NCHOME/precision/scripts/sh/scripts/ncp\_storm\_validate.sh db

**Answer:** A

4.DRAG DROP

What is the correct sequence of steps for the requirements-gathering phase?

Unordered Options	Ordered Options
Identify stakeholders	1
Confirm understanding of requirements with stakeholders	2
Get stakeholders to give voice to their requirements, pain points, and wish lists and get them to explain existing business processes	3
Create a document of understanding that specifies requirements and defines the scope of the project	4
Document stakeholder requirements and existing processes	5
Understand what the customer's business does and where they operate	6

**Answer:**

### Unordered Options

### Ordered Options

- 1 Identify stakeholders
- 2 Confirm understanding of requirements with stakeholders
- 3 Get stakeholders to give voice to their requirements, pain points, and wish lists and get them to explain existing business processes
- 4 Create a document of understanding that specifies requirements and defines the scope of the project
- 5 Document stakeholder requirements and existing processes
- 6 Understand what the customer's business does and where they operate

5.A custom discovery stitcher creates a temporary table or array called customData using the Record customData; statement. Since implementing the custom stitcher, the amount of available memory on the ITNM server decreases more than normal while discovery is running.

What is a potential problem?

- A. The customData table was not truncated before running the new discovery
- B. The stitcher is missing the delete (customData); statement
- C. The stitcher is missing the empty (customData); statement
- D. The stitcher is missing the end statement on the last line of the stitcher so the stitcher never finishes

**Answer: A**
