3.What is the correct logical sequence of events for a Maximo installation?

A. install Maximo, provision hardware, perform initial middleware configuration

B. provision hardware, perform initial middleware configuration, install Maximo

C. provision hardware, install Maximo, perform initial middleware configuration

D. install Maximo, perform initial middleware configuration, create directory server users

Answer: B

4.A company's users are seeing slow performance when opening the Work Order Tracking application. After some investigation it is determined that the default query is doing a full table scan.

How can this be prevented?

A. Verify default table indexes exist.

B. Verify columns in the SQL statement WHERE clause are not indexed.

C. Verify no leading wildcard character in the SQL statement WHERE clause.

D. Verify the Maximo user executing the SQL statement has query rights to the table.

Answer: A

5.An administrator has a requirement to export XML and flat files from a publish channel to a specific directory location.

Which system property will need to be modified to contain the location value?

A. mxe.int.globaldir

B. mxe.int.intglobaldir

C. mxe.int.meaglobaldir

D. mxe.maximo.globaldir

Answer: A
