Exam : C2150-197

**Title : IBM Security Identity
Manager V6.0
Implementation**

Version : DEMO

1.Which is true for the relationship between provisioning policies, services, and roles?

- A. A provisioning policy governs only services that are associated the same business unit or sub tree of the business unit with which the policy is associated. A role referenced in the provisioning policy must be associated the same business unit or sub tree of the business unit with which the policy is associated.
- B. A provisioning policy governs only services that are associated the same business unit or sub tree of the business unit with which the policy is associated. A role referenced in the provisioning policy can be anywhere in the tree of the organization.
- C. A provisioning policy governs services that are anywhere in the tree of the organization. A role referenced in the provisioning policy must be associated the same business unit or sub tree of the business unit with which the policy is associated.
- D. A provisioning policy governs services that are anywhere in the tree of the organization. A role referenced in the provisioning policy can be anywhere in the tree of the organization.

Answer: A

Explanation:http://www01.ibm.com/support/knowledgecenter/SSRMWJ_6.0.0.2/com.ibm.isim.doc_6.0.0.2/planning/cpt/cp_t_ic_plan_orgtree_scope_polprov.htm

2.When applying an IBM Security Identity Manager (ISIM) fixpack in a clustered ISIM installation which statement is correct?

- A. Websphere application and messaging clusters must be stopped prior to installing the ISIM fixpack.
- B. Websphere application and messaging clusters must be running prior to installing the ISIM fixpack.
- C. All Websphere processes must be stopped prior to installing the ISIM fixpack.
- D. All Websphere processes must be running prior to installing the ISIM fixpack.

Answer: A

3.Which actions are best practice for securing IBM Security Identity Manager LDAP data?

- A. Disabling anonymous read access, enabling SSL communication only
- B. Allow only read access to IBM Security Identity Manager LDAP
- C. Run the IBM Security Identity Manager server as non-root user
- D. Enabled WebSphere global security

Answer: A

Explanation:http://www01.ibm.com/support/knowledgecenter/SSRMWJ_6.0.0.2/com.ibm.isim.doc_6.0.0.2/securing/cpt/cp_t_ic_security_ssl_recommend.htm?lang=en(expand security, and click secure environment practices, see table 1)
