Exam : **HP0-S20**

Title : Implementing HP BladeSystem

Version : DEMO

1. What does the HP StorageWorks All-in-One SB600c Storage System provide? (Select three.)
A. data protection
B. support for SCSI disk subsystems
C. shared storage for application servers
D. synchronous data replication
E. enhanced file serving for end-user clients
Answer: ACE

2. You have collected and evaluated data from a series of reports and subsystems of an HP c-Class
enclosure and server blades. You are now ready to develop an action plan that addresses the
outstanding
issues you identified.
In accordance with the HP Troubleshooting Methodology, which tasks should you perform in order to
develop an optimized action plan for your customer? (Select two.)
A. Identify the steps necessary to implement each solution.
B. Isolate faults to a hardware or software system.
C. Identify possible solutions for each possible root cause.
D. Identify the cause of the failure and implement preventive measures.
Answer: AC

3. What is required to enable online spare memory?
A. All memory banks available in the server must be populated with DIMMs of the same capacity.
B. Four-way interleaving must be enabled in the ROM-Based Setup Utility (RBSU).
C. The DIMMs in the spare bank must be the same capacity or larger than those in the other banks.
D. The spare memory bank must be counted and added to the system memory count reported to the
operating system.
Answer: C

4. What are advantages of using point-to-point storage technology with Serial Attached SCSI (SAS)?
(Select two.)
A. higher fault tolerance of the disks
B. better isolation of hard drive failures
C. increased bandwidth
D. backwards compatibility with parallel SCSI cables
Answer: BC

5. What can be configured to allow an additional server to take over operations from a failed server?
A. SmartLink
B. high-availability clustering
C. cloud computing
D. RAID 5
Answer: B

6. Which virtualization technologies are supported in c-Class server blades? (Select three.)

A. Microsoft Virtual Machines

B. VMware Workstation

C. Integrity Virtual Machines

D. VMware ESX

E. Virtual Partitioning

Answer: ACD

7. Which features are new to the ProLiant G6 Intel-based server blade line? (Select two.)

A. NUMA (Non Uniform Memory Access) Architecture

B. internal SD card slot

C. SAS 1.0 Smart Array Controller

D. registered DDR2 DIMM support

Answer: AB

8. What is a new feature of ProLiant G6-series server blades?

A. internal SD card slot

B. internal USB port

C. PCI Express 1.0 ports

D. small form factor SAS drives

Answer: A

9. Which memory slots must be populated first in a ProLiant BL490c G6?

A. white

B. black

C. blue

D. brown

Answer: A

10. Which features does the HP iLO Advanced for BladeSystem license include? (Select two.)

A. global team collaboration

B. server migration pack

C. enhanced networking

D. headless server deployment

E. integration with LDAP services

Answer: AE
