**Title : Great Plains 8.0 Modifier
with VBA**

Version : DEMO

1. In Modifier, the user opens the IV_Item_Transaction_Inquiry window. This window contains a scrolling window. Where can the user look to verify the type of scrolling window?

- A. Property Sheet - Object Tab
- B. Property Sheet - Visual Tab
- C. Toolbox - Drop Down List
- D. Layout - Preview

Answer: A

2. Original Great Plains windows customized using Modifier get stored in the Forms.dic. When does the Forms.dic get created?

- A. Installation of Great Plains
- B. Opening of Great Plains
- C. The first time you access Modifier from the application
- D. When reg keys are added to allow access to Modifier

Answer: C

3. You are asked to customize the PM Vendor Maintenance window by adding a new local field called Email Address. After adding the field you create a text prompt for that field. What should you do so the user can visually tell that it is a required field? (Each correct answer presents part of the solution. Choose two.)

- A. Auto-link the text prompt to the field
- B. Use Link Prompt to link the text prompt to the field
- C. Use Link Lookup to link the field
- D. Change the Required property for the field to true

Answer: BD

4. The user accesses Modifier and opens the Great Plains Dictionary. The PM Vendor Maintenance Form Definition window is open and a change is made to the "Options" menu. What type of menu is being customized?

- A. Form Level

- B. Main Menu
- C. Third-Party Form Level
- D. Third-Party Main Menu

Answer: A

5. In Modifier the user opens an existing data type "DDL_Country". This data type is a drop-down list containing 3 static text values. What options are available for customizing the static text values?

- A. Insert
- B. Remove
- C. Replace
- D. Edit

Answer: C

6. In Great Plains, formats are used to display data a particular way. For example a phone number could contain a format with and without an extension. Using Modifier which resource would be used to attach a format?

- A. Data Type
- B. Field
- C. Table
- D. Window

Answer: A

7. You would like to customize a window and have the window layout open in Modifier. Which window properties can be changed using Modifier?

- A. AutoOpen
- B. Title
- C. Name
- D. WindowID

Answer: AB

8. Using Modifier how can multiple fields be selected within the window layout?

- A. Hold down the Control Key while clicking on the fields
- B. Hold down the Shift Key while clicking on the fields
- C. Hold down the Alt Key while clicking on the fields
- D. Lasso the fields using the mouse

Answer: ABD

9. In Great Plains scrolling windows are used to display multiple lines of information. What types of scrolling windows exist in the Great Plains application?

- A. Browse Only
- B. Editable
- C. Adds Allowed
- D. User Defined

Answer: ABC

10. In the Great Plains application, how can you visually identify that a window has been customized using Modifier?

- A. "Modified" is displayed at the top of the window
- B. "Modified" is displayed at the bottom of the window
- C. "Modified" appears after the title of the window
- D. A period appears before the title of the window

Answer: D

11. Global changes can be made to some resources in Great Plains. When a global change is made, this change affects the entire dictionary. Using Modifier, what type of resource can be customized with a global change?

- A. Pictures
- B. Data Types
- C. Tables
- D. Messages

Answer: ABD

12. In Modifier, how can you change the property of a field or a window using the Properties Window?

- A. Double-click on the property to change it's value
- B. Select a value from a list
