Exam : **MB4-349**

Title : SI 6.5 Installation & Configuration

Version : DEMO

1.What Microsoft Dynamics SL module must be installed and set up to allow the scheduling and off loading of processes to a designated machine?

A.General Ledger

B.Accounts Payable

C.Accounts Receivable

D.Application Server

Correct:D

2.What is the primary reason for installing additional servers in the Microsoft Dynamics SL hardware environment?

A.To offload printing, email and file services from the main database server

B.To make more hard disk storage space available

C.To allow for duplicate data entry

D.To provide a redundant environment that would prevent a total system failure in the event of a server crash

Correct:A

3.What is the purpose of Microsoft Dynamics SL's two-database design? Choose the 2 that apply.

A.Provide data redundancy that protects the financial data in the event of a system crash.

B.Maintain system data separately from financial data for storage and operating efficiency.

C.Allows Microsoft Dynamics SL to distribute data evenly across databases.

D.Permit multiple Application databases to coexist on the same computer system.

Correct:B D

4.Which of the following are SQL Server back up types? Choose the 3 that apply.

A.Full database backup

B.Transaction log backup

C.Differential back up

D.Nightly Backup

Correct:A B C

5.What is the purpose of referential Integrity?

A.Enforces the relationship between a Microsoft Dynamics SL system database and its application databases.

B.Enforces the relationship between database tables.

C.Enforces the relationship between the Microsoft Dynamics SL System Manager module and all other Microsoft Dynamics SL modules.

D.Enforces the relationship among all windows (data entry, maintenance, processing, reporting) making up a Microsoft Dynamics SL module.

Correct:B

6.You wish to deploy Microsoft Dynamics SL in an environment with 34 concurrent users. Which edition needs to be installed?

A.Single-User Microsoft Dynamics SL Standard Edition

B.Multi-User Microsoft Dynamics SL Standard Edition

C.Microsoft Dynamics SL Enterprise Edition

D.Microsoft Dynamics SL Professional

Correct:D

7.Which Microsoft versions of Windows are supported for a Microsoft Dynamics SL client

installation? Choose the 2 that apply.

A.Windows 95

B.Windows 2003

C.Windows XP Professional

D.Windows 2000 Professional

Correct:C D

8.Which of the following statements about referential integrity is true?

A.Referential integrity is programmed into Microsoft Dynamics SL application windows.

B.Referential integrity is solely the responsibility of the Microsoft Dynamics SL System Manager module.

C.Microsoft Dynamics SL's referential integrity functions are closely connected to the referential integrity functions provided by Microsoft SQL Server.

D.You can optionally activate Microsoft SQL Server's referential integrity capabilities to extend the referential integrity capabilities of Microsoft Dynamics SL.

Correct:A

9.When consulting with a customer in regard to needed hard disk space for Microsoft Dynamics SL databases, which of the following responses would you choose?

A.A typical system and application database together will not require more than 100 MBs

B.A typical system and application database together will require a minimum of 1 GB required

C.A typical system and application database together need anywhere from 30 GBs to several hundred GBs

D.A typical system and application database together need anywhere from 300 MBs to several GBs

Correct:D

10.What remote connectivity solutions does Microsoft Dynamics SL support running on?

A.The client installed on a workstation that is connected to the server by a T1 line. (WAN)

B.Windows Terminal Server

C.PC Anywhere

D.A dial up connection

Correct:B

11.When analyzing a company for Standard Edition vs. Professional Edition for Microsoft Dynamics SL, what profiles would be most suitable for Standard Edition? Choose the 2 that apply.

A.Use Flexkey capability to segment the Inventory ID

B.15 users using Solomon six to eight hours/day

C.10 or less users

D.Need Multi-company processing

Correct:A C

12.Which of the following statements about the Microsoft Dynamics SL System database is false?

A.The System database contains Microsoft Dynamics SL product registrations, security settings and database field attributes.

B.The System database does contain some accounting data.

C.A separate System database must be created for each Application database you define.

D.The System database eliminates the need for redundant system-level information in Application databases.

Correct:C

13.Which of the following could cause problems with a Microsoft Dynamics SL installation?

Choose the 3 that apply.

A.Conflicting .dlls

B.Inadequate RAM

C.Using a USB keyboard and mouse

D.Out of date Windows and SQL Server service packs

Correct:A B D

14.What program do you use to set up SQL back up jobs?

A.SQL Profiler

B.Microsoft Dynamics SL Database Maintenance

C.Enterprise Manager

D.Service Manager

Correct:C

15.Good implementation policies recommend a "pre-installation" process. Which of the following should be included in a pre-installation process? Choose the 3 that apply.

A.You can optionally activate Microsoft SQL Server's referential integrity capabilities to extend the referential integrity capabilities of Solomon.

B.Protect the data of any current accounting software that Microsoft Dynamics SL is replacing.

C.Verify adequate hardware and software resources to run Microsoft Dynamics SL..

D.Obtain the tools and resources used before, during and after the installation of Microsoft Dynamics SL program files.

Correct:B C D

16.When installing Microsoft Dynamics SL to a workstation that is running Windows XP, what account should you be logged into the computer with?

A.Administrator

B.Power User

C.It does not matter for Windows XP

D.User

Correct:A

17.What backup scheme would be the most efficient for a company that has a high transaction volume that is concerned with the amount of data that could be lost?

A.A full backup nightly.

B.A full backup weekly and transaction log backups throughout the day.

C.A full backup weekly, a differential backup nightly and transaction log backups throughout the day.

D.A full backup weekly and transaction log backups nightly.

Correct:C

18.Which of the following would be considered an "Initialization" process as opposed to "normal operation"?

A.Enter vouchers & adjustments

B.Load the database with beginning balances and historical data

C.Make a backup of the database

D.Run Physical Database Integrity

Correct:B

19.Which is the correct order of Microsoft Dynamics SL user access rights from most to least restrictive?

A.View, insert, update, delete, initialization

B.View, update, insert, initialization, delete

C.View, update, insert, delete, initialization

D.View, update, delete, insert, initialization

Correct:C

20.How do you access the Database Maintenance program to create a new Application database?

A.From the Utility menu within Microsoft Dynamics SL

B.It is run from the Utility menu list

C.It is run from the icon in the Microsoft Dynamics SL program folder

D.It is an option in the Microsoft SQL Server Enterprise Manager program after the initial installation of Solomon

Correct:C
