Title : AX 2009 Installation & Configuration

Version : DEMO

1.You work in an International company which is called Luxwet. And you're in charge of the network of your company. Now you work as an installer intending to install multiple application instances. So how is this done in Microsoft Dynamics AX 2009?

A.There cannot be multiple Application instances on the same server.

B.The installer will need to create a separate logical drive for each application instance.

C.The instances can be installed on the same machine, but the installer must provide a separate root directory for each application.

D.The installer supplies an application instance name for each instance. Then, all applications are installed in the same root folder.

Correct:D

2.You work in an International company which is called Luxwet. And you're in charge of the network of your company. Now you work as an implementer intending to connect a client to a different Application Object Server instance by using the Microsoft Dynamics AX Client Configuration utility. In order to access the client configuration utility, what user group must the implementer be part of?

A.Guests

B.All users

C.Power Users

D.Administrators

Correct:C D

3.You work in an International company which is called Luxwet. And you're in charge of the network of your company. In order to improve the total cost of ownership for Microsoft Dynamics AX customer, how has the installation changed?

A.A patch file is automatically created corresponding to each installer file making it easier to patch the system.

B.Each component of the Microsoft Dynamics AX system has its own installer.msi file) making it easier to troubleshoot installations.

C.All components including the Application object Server (AOS) reside in a single components (.msi) file so that all components can be patched by a single patch

D.msp) file.

E.All components, other than the Application Object Server (AOS), reside in a single components installer (.msi) file so that most components can be patched by a

F.msp) file.

Correct:D

4.You work in an International company which is called Luxwet. And you're in charge of the network of your company. When the Application Object Server user account is created in the database, to what roles is it assigned? (choose more than one)

A.dbcreator

B.db_ddladmin

C.db_datawriter

D.db_datareader

Correct:B C D

5.You work in an International company which is called Luxwet. And you're in charge of the network of your company. In the following options, which manages each instance of the

Application Object Server?

A.Database entries.

B.Config.ini files.

C.Configuration Files.

Correct:C

6.You work in an International company which is called Luxwet. And you're in charge of the network of your company. Now you work as an implementer intending to perform multiple installations of Microsoft Dynamics AX on the same computer. In the following options, which can have multiple installations on the same machine? (choose more than one)

A.Reporting Server

B.Application Files

C.Enterprise Portal Server

D.Application Integration Server

Correct:B

7.You work in an International company which is called Luxwet. And you're in charge of the network of your company. In which environment that you prefer to use a domain account rather than use a network services account?

A.Test

B.User

C.Production

D.Development

Correct:C

8.You work in an International company which is called Luxwet. And you're in charge of the network of your company. Now you work as an implementer. In an implementation with multiple Application Object Servers in a cluster that is not using load balancing, when might it be necesarry to change the client configurations to connect clients to a different server?

A.If the cluster is renamed.

B.If a new AOS is added to the cluster.

C.If an AOS is removed from the cluster.

D.When multiple AOS instances reside on the same server.

Correct:C

9.You work in an International company which is called Luxwet. And you're in charge of the network of your company. In the following options, which is not feature of load balancing?

A.Easy scalability to handle increased data requests.

B.Ability to assign a group of users to one part of a cluster.

C.New client requests are distributed to other servers if there is a server failure.

D.A cluster of servers that balances the network data requests to the AOS across all available servers.

Correct:B

10.You work in an International company which is called Luxwet. And you're in charge of the network of your company. Now you work as an implementer. And when will you choose a custom installation? (choose more than one)

A.To install additional object servers

B.To install the application file server

C.To install each role on its own computer

D.To install an additional client computer

Correct:A C D

11.You work in an International company which is called Luxwet. And you're in charge of the network of your company. Now you work as an implementer and you have installed multiple Application Object Servers in a cluster. Now you have to remove one from the cluster for maintenance. You must set the AOS to not accept new client connections. So which is used to do this?

A.Online users form.

B.Client Administration form.

C.Microsoft Dynamics AX Server configuration utility.

D.Microsoft Dynamics AX Client configuration utility.

Correct:A

12.You work in an International company which is called Luxwet. And you're in charge of the network of your company. What do the application files provide when the Application File Server is installed?

A.Patch information for each layer.

B.Database information for each layer.

C.Configuration information for each layer.

D.Index, headers, help, and labels for each layer.

Correct:D

13.You work in an International company which is called Luxwet. And you're in charge of the network of your company. In the following options, which accounts should have permissions to the application file folder? (choose more than one)

A.All clients.

B.Windows administrators.

C.Database server service.

D.Application Object Server service.

Correct:B D

14.You work in an International company which is called Luxwet. And you're in charge of the network of your company. Before e completing the Initialization Checklist, a user is added to the Sales User group. What permissions does the user get?

A.No permissions.

C.Read-only permissions.

D.Sales User Group permissions.

Correct:B

15.You work in an International company which is called Luxwet. And you're in charge of the network of your company. In order to run the initialization checklist without interaction, what steps are used to do this? (choose more than one)

A.Start Microsoft Dynamics AX from a command line.

B.Run the configuration utility to create an XML file.

C.Provide an XML file as a parameter to Microsoft Dynamics AX.

D.Create an XML file including each checklist item to be executed.

Correct:A C D

16.You work in an International company which is called Luxwet. And you're in charge of the network of your company. Now you work as an implementer. During the testing phase, you want to run the checklist without user interaction using an XML file called configuration.xml stored in the C:\AX directory. Which command line is used to start the installation checklist without user interaction?

A.ax32.exe -AutoRun c:\Ax\Configuration.XML

B.ax32.exe -StartupCmd=c:\Ax\Configuration.XML

C.ax32.exe -StartupCmd=Run c:\Ax\Configuration.XML

D.ax32.exe -StartupCmd=AutoRun c:\Ax\Configuration.XML

Correct:D

17.You work in an International company which is called Luxwet. And you're in charge of the network of your company. What is the result of executing the checklist items without interaction? (choose more than one)

A.The results are written to a log file.

B.The results are written to the database.

C.The results are stored in a configuration file.

D.The results are shown to the user in the Infolog.

Correct:A D

18.You work in an International company which is called Luxwet. And you're in charge of the network of your company. During the installation checklist process, what controls the access to features in the system?

A.Loading the license file.

B.Loading configuration keys.

C.Enabling configuration keys.

D.Synchronizing to the license file.

Correct:C

19.You work in an International company which is called Luxwet. And you're in charge of the network of your company. Now you work as an implementer intending to install clients without installing the Microsoft Microsoft Dynamics AX Client Configuration utility, what must the implementer do to accomplish this?

A.Set the ClientConfig parameter to zero.

B.Set the ClientConfig parameter to False.

C.Set the ClientConfigUtil parameter to zero.

D.Set the ClientConfigUtil parameter to False.

Correct:A

20.You work in an International company which is called Luxwet. And you're in charge of the network of your company. How are mandatory fields identified when using theTemplate Wizard?

A.They are marked with a green X.

B.They are marked with a red padlock.

C.They are marked with a red underline.

D.They are marked with an green asterisk.

Correct:B
