Title :   Symantec NetBackup 7.0
for Windows (STS)

Version : DEMO

1. A company installed Symantec NetBackup 7.0 on existing Windows 32-bit servers with 2 GB of RAM.

When configuring the Media Server Deduplication Option (MSDP), an error occurs.

What should be done to resolve this error?

A. add additional memory to the Symantec NetBackup servers

B. uninstall Symantec NetBackup and upgrade the servers to Windows 64-bit

C. run nbdevconfig to configure the storage servers

D. cluster the existing Symantec NetBackup servers and reconfigure the MSDP

Answer: B

2. If frequency-based cleaning of a drive is desired, which parameter must be set in the Symantec

NetBackup 7.0 administration console?

A. Cleaning Frequency (Between mounts)

B. Cleaning Frequency (In GB)

C. Cleaning Frequency (Between backups)

D. Cleaning Frequency (In hours)

Answer: D

3. A request is made to change volume residences.

Which two conditions must be met in the volume group that is associated with the changes? (Select two.)

A. All volumes in a volume group must have the same residence.

B. All volumes must have barcode labels.

C. All volumes must be assigned to scratch pool.

D. All volumes must be vaulted before adding volumes to the group.

E. All volumes must have the same media type.

Answer: AE

4. An administrator configures two standalone LTO4 tape drives on a Symantec NetBackup 7.0 media

server with an existing tape library with an LTO4 drive.

How should the administrator configure the storage units?

A. place each standalone drive in its own storage unit

B. place the two standalone drives in a single new storage unit

C. place the two standalone drives in an existing storage unit with the other LTO4 drives

D. place the two standalone drives in a new storage unit group

Answer: B

5. Refer to the exhibit.

In the exhibit, the server_data policy is greyed out and marked with a red "X."

What does this indicate?

A. The policy is using a FlashBackup policy, but the Enterprise client is unlicensed.

B. The policy is using an AdvancedDisk storage unit, but the Flexible Disk option is unlicensed.

C. The policy's "go into effect" date is disabled or set to a date in the future.

D. A backup run from this policy recently failed and the status is in the Activity Monitor.

Answer: C

6. An administrator needs to back up a Windows 2003 client and creates a backup selections list that includes the System_State directive.

What happens when the backup runs?

A. The backup runs successfully.

B. The job is partially successful. All files are backed up except the system state.

C. The backup fails. None of the files are backed up because Shadow Copy Components is required for Windows 2003 clients.

D. The backup fails. None of the requested files are backed up because Shadow Copy Components is required for Windows 2003 clients.

Answer: A

7. In which two processes does Symantec NetBackup 7.0 rehydrate deduplicated data? (Select two.)

A. Optimized duplication

B. Duplicate copy to tape

C. Restore to an OpenStorage device

D. Replicated copy

E. Restore to a client

Answer: BE

8. Which version of NetBackup client (at a minimum) is required to use Symantec NetBackup LiveUpdate?

A. 6.0 GA

B. 6.0 MP4

C. 6.5 GA

D. 7.0 GA

Answer: C

9. An administrator is checking the status of a standalone drive in the Device Monitor. The Control column status is AVR and the Ready column status is No.

What does this indicate?

A. The drive is down.

B. The drive is up and under operator control.

C. The drive is up and it is empty.

D. The drive is up, but the tape in the drive is busy.

Answer: C

10. Which command provides a list of disk pools required for restoring a client?

A. nbdevquery

B. bpimagelist

C. vmquery

D. bpdiskinfo

Answer: B

11. Refer to the exhibit.

An administrator needs to restore an individual file that was accidentally deleted from a server.

When selecting the backup images for a restore, the folders listed in the left-pane window are greyed out.

When selecting one of these folders, the list of files on the right-pane window is empty even though files have been backed up from this folder in the past.

What can the administrator do to restore individual files in the Backup, Archive, and Restore interface?

A. The administrator needs to login to a system, such as the master server, that has permissions to run the restore job.

B. The media with the data needs to be placed into the tape library, then the library needs to be inventoried.

C. The media with the restore data is encrypted and the password needs to be supplied.

D. The restore needs to be changed from a true image backup to a normal backup.

Answer: D

12. The Symantec NetBackup Startup and Shutdown commands on Windows are "bpup" and "bpdown"

In which directory can these commands be found?

A. install_path\NetBackup\bin

B. install_path\NetBackup\bin\admincmd

C. install_path\NetBackup\bin\support

D. install_path\NetBackup\bin\goodies

Answer: A

13. Catalog configuration can be configured to email which file to aid in catalog recovery?

A. BMR file

B. master server config file

C. support script output

D. DR file

Answer: D

14. An administrator needs to back up a file system with millions of files in the shortest amount of time.

Which option should be used?

A. enable "Compression" in the policy

B. use the FlashBackup policy type

C. enable "Collect True Image Restore" in the policy

D. use the AFS policy type

Answer: B

15. In a Symantec NetBackup 7.0 environment, where does the image database reside?

A. within the EMM database

B. on the media server

C. on the master server

D. within the master server's Sybase database

Answer: C

16. Which two databases are used by Symantec NetBackup 7.0? (Select two.)

A. Media

B. Image

C. Volume

D. EMM

E. Device

Answer: BD

17. A collection of all backup data from a client is assembled into a single stream and written to tape or

disk.

What is this called?

A. file metadata

B. backup policy

C. catalog .f file

D. backup image

Answer: D

18. Which Symantec NetBackup 7.0 volume pool is created by default?

A. Data

B. Scratch

C. None

D. Catalog

Answer: C

19. Which two types of storage will be used when a Symantec NetBackup 7.0 policy uses "Any Available"

for policy storage? (Select two.)

A. BasicDisk and AdvancedDisk storage units

B. Media Manager and NDMP storage units

C. storage units with the "On Demand Only" option disabled

D. storage unit groups

E. storage units with available media

Answer: CE

20. Which two calculations are required to size the Symantec NetBackup 7.0 catalog for a new installation?

(Select two.)

A. divide number of files by retention period

B. multiply number of files per backup by number of backups per retention period

C. multiply number of backups per day by number of clients

D. multiply number of files by average length of file names

E. divide full backups by retention period

Answer: BD
